- When installing optional Backguard Kit, cutout depth of 21-3/4" minimum/22-1/8" maximum needs increased to 24".
- Overhead cabinetry should not exceed a 13" maximum depth.
- Absolute minimum horizontal distance between overhead cabinets installed to either side of appliance must be no less than maximum width of appliance.

Countertop Preparation

Rangetop's side flanges overlap countertop cutout edges - for detailed preparation instructions, refer to product installation guide on the web.

- **Flat Square-Finish Countertops** - require no preparation since rangetop's flange lays directly on countertop edge.
- **Formed Front-Edged Countertops** - require front molded edge to be shaved flat 3/4" from each front corner of opening.
- **Tile Countertops** - may need trim cut back 3/4" from each front corner of opening and/or rounded edge flattened.
- For existing cutout width greater than 30-1/16" reduce the 3/4" overlap dimension; for cutout width of 29", replace actual side trim panels with smaller side trim panels, available with optional Side Trim Kit (refer to detailed kit installation instructions).

Note: For planning purposes only. Refer to Product Installation Guide on the web at frigidaire.com for detailed instructions.
